LOST & FOUND WEBSITE: outline
COLOR SCHEME: greens, grays, white (subject to change)

HOMEPAGE:
    Screen divided into 2 sections
    "Lost something?" → which links to the Lost items page
    "Found something?" → which links to the submission page

LOST PAGE:
  - MENU BAR: Lost page link; Found page link; Archives link
  - SEARCH BAR: icon opens to search bar; also has ticks you can check with already considered tags (Electronics, Apparel, Wallets, Identification, Accessories, and Miscellaneous); maybe include color options too
  - LAYOUT of the lost items
        - items listed in 2-5 columns depending on size of screen
        - just images in a square format
        - short summary of the items; when clicked will get full info
        - Location found, date, item description, contact info
        - Contact Button to directly contact

FOUND PAGE:
  - MENU BAR (same as Lost page)
  - LAYOUT: a form to fill out for the item found
    -Image
    -Category it falls under: Electronics, Apparel, Wallets, Identification, Accessories, and Miscellaneous
    -Item description: user types themselves
    -Location
    -Contact info (phone #, email, etc.)

**Valuables like Electronics, Wallets, and IDs will be specified to have less detailed info! It is up to the user to be the judge of worth ownership is true

ARCHIVES
  - MENU BAR
  - SEARCH BAR
  - LAYOUT: same style as Lost page but when you hover over image, the date shows up

ITEM PAGE:
  - LAYOUT: Image of object, date, description, location, contact info, and other info specified by the postee
