

Landing page:

- list of items either lost or found, with a tag that identifies if someone found something or lost something.
- Ability to filter by lost or found, date, category, search etc
- Button to add new item (aka lost or found). Could be one button and then you are asked category, or could be two buttons which each pop up different form
- Text Search javascript
- Statistics on the page

Filter on landing page:

- Date (before, after, range)
- Categories (ID, clothing, accessories, electronics, miscellaneous)
- Locations

Form:

- Item name
- Item description
- Image
- Date/time
- Location
- Contact info (email/facebook messenger)

Page for each item

- Item name
- Item description
- Image
- Date/time
- Location
- Contact info
- Lost or found
- categories

Do you have them or did you leave them there?

“Resolved”/Deleted

after a certain amount of time? sending reminder to the poster?

Lost and found statistics

Lost: 1000, Found: 50

Really brief guide for people who find things

i.e. don't tell the world where you left someones computer

Security and safety - how to make the exchange

protect anonymity as a poster

make sure the item actually belongs to the person
